According to Zoosh and John, they are already here and have already gone for a while and will continue in the future. Sounds like a worthy focus to me. I ended up wishing I had read it first and paid more attention to the places rather than the way they were being sold. Then suddenly, this book! So I took the hope that it would help me understand what I was seeing, and it happened. In any case, the text of this box is a bit like an update of Alice in Wonderland and the numerous authors' guides / m ©diuns / sps / messengers seem to be living in a different world from the rest of *.
